Please accept this recommendation letter for the service provided by "Media Design" Company

"AZCHEMCO" LLC generates ideas and projects in the areas of supporting norms and standards in the field of food safety in Azerbaijan.

At the very beginning of the work, we understood that the site we were planning should convey the uniqueness of our products. We liked working with the Media Design studio for its professional approach, we believe that we were quite demanding customers. The employees of Media Design correctly understood what we wanted from them, advised and prompted. So, with joint efforts, we created the www.azchemco.az site. Today, we continue to cooperate with the Media Design company.

Executive Director

Kamilli Ramil
